Introduction

SmartCity® WebCamera systems are the visual solution for businesses and municipalities. The system is a network infrastructure, powering a suite of software applications that connect Internet users and visual resources, including tools for sharing visual data and live web cameras. SmartCity® WebCamera utilizes wireless web cameras - but provides definitively more than any ordinary web camera software can offer. Once SmartCity® WebCamera is a part of your web site, our central server provides access for authorized users, manages the traffic of visual information sent to users from the video sources they each choose, and ensures the network's overall integrity. You and your team are able to create, store and manage visual data and network systems over the Internet. Anyone with an Internet connection and the appropriate rights can look around your SmartCity® WebCamera -enabled location, LIVE, as if they were actually on site. Your web site will become a truly vital part of your growing business.

SmartCity® WebCamera Overview

SmartCity® WebCamera software is a proven visual business solution. Our live web cam software combined the Web's universally available connectivity and IP web cams satisfies people's innate desire to see and understand their world.

SmartCity® WebCamera Municipality Applications

Wireless Camera Surveillance.

With the advent of low-cost Wi-Fi cameras, patrol officers in their vehicles can obtain quick access to images of intersections and streets, high crime areas, schools and other surveillance areas. Fire engines and response teams can use these wireless cameras to monitor the status of a fire out of harms way.

Sport Events & Stadiums.

The installation of the SmartCity® WebCamera will allow fans to be part of the action wherever they are using any internet connection.

Construction Sites.

SmartCity® WebCamera cam software is an invaluable construction job site management tool for all projects throughout the municipality.

Day Care Centers and Schools.

SmartCity® WebCamera give parents a chance to check in on their children throughout the day with live internet web cams they control.
