Introduction

Today's communication challenge is broadband. Everybody wants it, every system claims providing it, but reaching users with secure, reliable, cost-effective broadband service has been the greatest challenge. The process of designing, installing, integrating, maintaining and expanding complex broadband networks has been always time consuming.

DTLink Inc., SmartCity® wireless broadband products combine carrier-grade toughness with exceptional performance, security, ease-of use and cost effectiveness. It significantly reduces the time design and deploy new commercial and enterprise broadband networks.

SmartCity® 2.4GHz Wireless Products

The SmartCity® wireless platform offers the lowest total cost of ownership in the industry and can deliver proof of business case with ROIs in just several months because of the use of an unique product built around the most powerful wireless router card.

Easily configurable with one or two radio cards (Atheros or Prism) and one or two LAN cards and a built-in patch antenna, the SmartCity® product can be either a powerful Access Point, Bridge or CPE device for any type of customer.

SmartCity® Advantages

- All-In-One Device
- Cost Effective Solution
- High-Speed Wireless Links
- IP-NAT, Routing, DHCP
- Security, Firewall
- Fast & Easy Installation and Deployment
- Graphical Configuration Interface (SmartCity® NMS)
- Complete Integration With The SmartCity® system

SmartCity® network without any changes to the users' configuration. Municipality employees are now free to print to any printer at any municipality's building covered by SmartCity® lowering maintenance, faxing and printing costs.

SmartCity® Router OS Features

- Router
- Bandwidth Manager
- Firewall
- Wireless AP/Router
- Multiple SSID Support
- QoS Support
- Packet Scheduling
- Policy Based Routing
- Integration With SmartCity® system
- DHCP Server/Client
- Run-time Configuration & Monitoring
